

ImplantConneqt & Anthogyr present

POST-GRADUATE DIPLOMA IN **IMPLANT DENTISTRY**

Reaching #ClinicalFreedom

A solid foundation of knowledge and experience begets excellence in dentistry. It's a new path in a great adventure towards **#ClinicalFreedom**.

Creating a new path begins with **one step**.

This Post-Graduate Diploma in Implant Dentistry was carefully put together with a complete range of subjects using evidence-based techniques and experienced mentorship. In this new path you will sharpen your capabilities and solidify your confidence to offer ever-more innovative solutions to a wider range of patients.

Your great adventure starts today.

An Introduction

IMPLANT CONNEQT

Implant Conneqt provides high-quality, accessible training for various members of the dental team looking to advance their knowledge and skills in implant dentistry. The instruction also goes beyond the initial programme, with on-going dialogue facilitated between trainers and delegates to offer further assistance and ensure that new skills can be applied to practice safely and effectively. The team at Implant Conneqt believes in supporting colleagues in their pursuit of education and development over time, building a network of people for increased learning opportunities and optimal growth.

All training is designed by practising professionals who understand the nuances of delivering care on a daily basis. They strive to ensure every programme focuses on evidence-based techniques, the latest innovations and best practice guidelines, putting patient safety and experience at the fore.

Anthogyr is a French designer and manufacturer of globally trusted dental implant and prosthetic solutions. Based in the Alps, in the Mont-Blanc Valley, near Chamonix, Anthogyr have been developing their industrial expertise for **over 70 years** through the production of high precision medical and dental devices.

Specialising in dental implantology for decades, Anthogyr is recognised for their strong capacity for innovation and creativity – giving you, the customer, the power of choice and clinical freedom.

As part of the powerhouse that is the Straumann Group, Anthogyr is supported by exceptional customer services. In the United Kingdom, the Straumann Group is one of the very few organisations in the dental industry with a complete office and warehouse infrastructure, enabling solid support to customers with quality assurance and agility. A global partner with local support.

Why This Course?

ONLINE MODULES

1-TO-1 CLINICAL PRACTICAL SESSIONS

PLACE AND RESTORE UP TO 10 IMPLANTS

Why Choose This Course?

There are several features that distinguish this course from others in the profession.

Firstly, the modules are comprehensive in the vast range of topics they cover, so delegates will receive a detailed yet broad overview of implant dentistry. They are also delivered in a flexible format that makes learning around current work and other commitments easier. **All the theoretical modules are completed online and so can be accessed at a time and place that best suits you to ensure no loss of income, no patient disruption and fewer barriers to career development.**

With regards to the practical elements, the course guarantees that **every delegate will place and restore up to 10 dental implants.** This is significantly more than most similar courses out there and ensures that you gain the hands-on experience you need to move forward with the treatment modality in practice safely and with confidence. Of course, all training is delivered by world-leading clinicians and instructors, but more than that, quality teaching is further ensured by one-to-one tuition throughout.

Another factor that sets this training apart is that all delegates have a **1-to-1 session with a leadership development specialist.** This enables individuals to truly maximise on their investment by helping them to effectively manage any stress or challenges that can come with learning a new field of dentistry. In not overlooking **mental health**, the course allows delegates to avoid feeling overwhelmed so they can focus solely on their development.

With the addition of discussions around the business of implant dentistry, delegates can fill any gaps in their knowledge to ensure they are able to turn their new clinical skills into a viable and profitable service offering once training is complete. As such, this course really does give delegates all the tools they need to make dental implantology a successful part of their career progression.

About The Course

- 13 modules including 8 clinical days and 1 residential module
- Place and restore up to 10 implants over 8 clinical days
- 1 clinical day dedicated to hands-on soft tissue surgical techniques
- For clinicians new to dental implants or who need more experience to build confidence

Enrol any time

One-to-one instruction throughout

60 CE credits (600 hours of CPD)

£7,250 + VAT

This blended learning programme enables delegates to achieve a Level 7 postgraduate diploma in dental implantology, accredited by EduQual. It consists of 12 remote modules containing 4-5 lectures each, which can be accessed anytime, anywhere for versatility and convenience, as well as 8 clinical days and a residential module to consolidate knowledge and practical skills.

All practical sessions are delivered at established clinical centres across the UK, enabling delegates to place and restore implants under the supervision and with the guidance of highly experienced implant dentists. The added benefit is that all patients are provided so you needn't worry about finding your own.

The comprehensive nature of the course makes it perfect for clinicians who are either completely new to dental implantology, or those who have taken some courses but need further training to gain confidence and start offering treatment in their own practices.

Upon enrolling – which you can do at any time as the programme start is entirely flexible – you will receive a course pack with all the information you will need to guide you through the modules. You will also be introduced to your supervisor and mentor who will be with you all the way through training to ensure you have somewhere to turn with questions at any time.

The final residential course includes a trip to Chamonix, France, where delegates can witness the implant manufacturing process in Sallanches, meet the Anthogyr team delivering the products and really get to understand the materials. This is essential for any dentists to fully understand what they are placing, how and why. Delegates will also be able to improve their appreciation for the restorative workflow, especially with reference to the latest digital technologies.

Beyond the course, you will have access to on-going mentoring from highly experienced and respected implant clinicians. This means that you have expert support as you transfer your new skills into practice and apply your knowledge to your own service offerings.

At just £7,250 + VAT – which includes all 13 modules, access to theory sessions online, one-to-one instruction, clinical supervision, the residential weekend and trip to Sallanches – this course provides exceptional value!

www.implantconnect.com

Course Modules

A total of 13 modules are provided, including 4-5 lectures each for theoretical modules, 8 clinical sessions and a residential at the end of the training programme. Every lecture concludes in a short online assessment to ensure the material has been understood. The end of year exam at the end of the 13 modules is combined with the residential to demonstrate completion of the course and achievement of a level 7 Diploma in Dental Implantology, awarded by EduQual.

The modules cover:

MODULE 1: Introduction to Dental Implantology

- History of dental implants
- Importance of evidence-based research and techniques
- Informed patient consent
- Record keeping
- Medical emergencies and managing them
- Clinical photography

MODULE 2: CBCT Training

- Principles of CBCT imaging and its limitations
- Radiation dose and related UK legislation/guidance
- Dental radiography in treatment planning and management
- Image evaluation and the radiologist's report
- Common CBCT imaging artefacts

MODULE 3: Anatomy and Physiology

- Structures of the maxilla and mandible
- Pharmacology and its relevance in implant dentistry
- Diseases of the bone and common pathological conditions of the soft and hard tissue
- Bone physiology and osseointegration

MODULE 4: Treatment Planning and Case Selection

- Comprehensive patient assessment
- Assessment and case selection workflow
- Principles, science and theory of occlusion and its impact in assessment and treatment management

MODULE 5: Surgical Techniques

- Flap designs and surgical approaches
- Principles of exodontia and ridge preservation
- GBR and bone augmentation materials
- Sinus lift techniques
- Indications for soft tissue surgery
- Suture techniques
- Practical session on soft tissue surgical techniques as 1 clinical day

MODULE 6: Implant Design and Materials

- Overview of surgical instruments
- Overview of materials, implant designs and their impact on osseointegration
- Abutment materials and design features
- Surgical drill kits, drilling protocols and implant placement clinical sequence

MODULE 7: Surgical Guides

- Obtaining accurate data and common errors
- Types of surgical guides, drilling protocols and partial vs fully guided surgery
- Designing surgical guides using SMOP
- Pilot guided implant surgery
- Fully guided implant surgery

MODULE 8: Prosthetic Training

- Restoring single and multiple unit cases
- Restoring anterior and posterior cases
- Screw vs cement retained restorations
- Workflow – impressions, materials, techniques and components
- Abutment selection
- Crown design

MODULE 9: Prosthetic Training (Lab) and Aftercare

- Analogue vs digital workflow – lab perspective
- Peri-implant health assessment and risk factors
- Science, development and management of peri-implantitis
- GDP/DCP roles in implant maintenance

MODULE 10: Implantology and Other Disciplines

- Endodontically-treated teeth and implants
- Endodontic treatment vs implant placement
- Orthodontics and implantology planning, placement and maintenance
- Periodontology and implantology planning, placement and maintenance

MODULE 11: Personal Growth and Wellbeing

- The inner critic
- Principles of communication and gravitas
- Managing stress
- Assertive communication and behaviour

MODULE 12: Practice Management

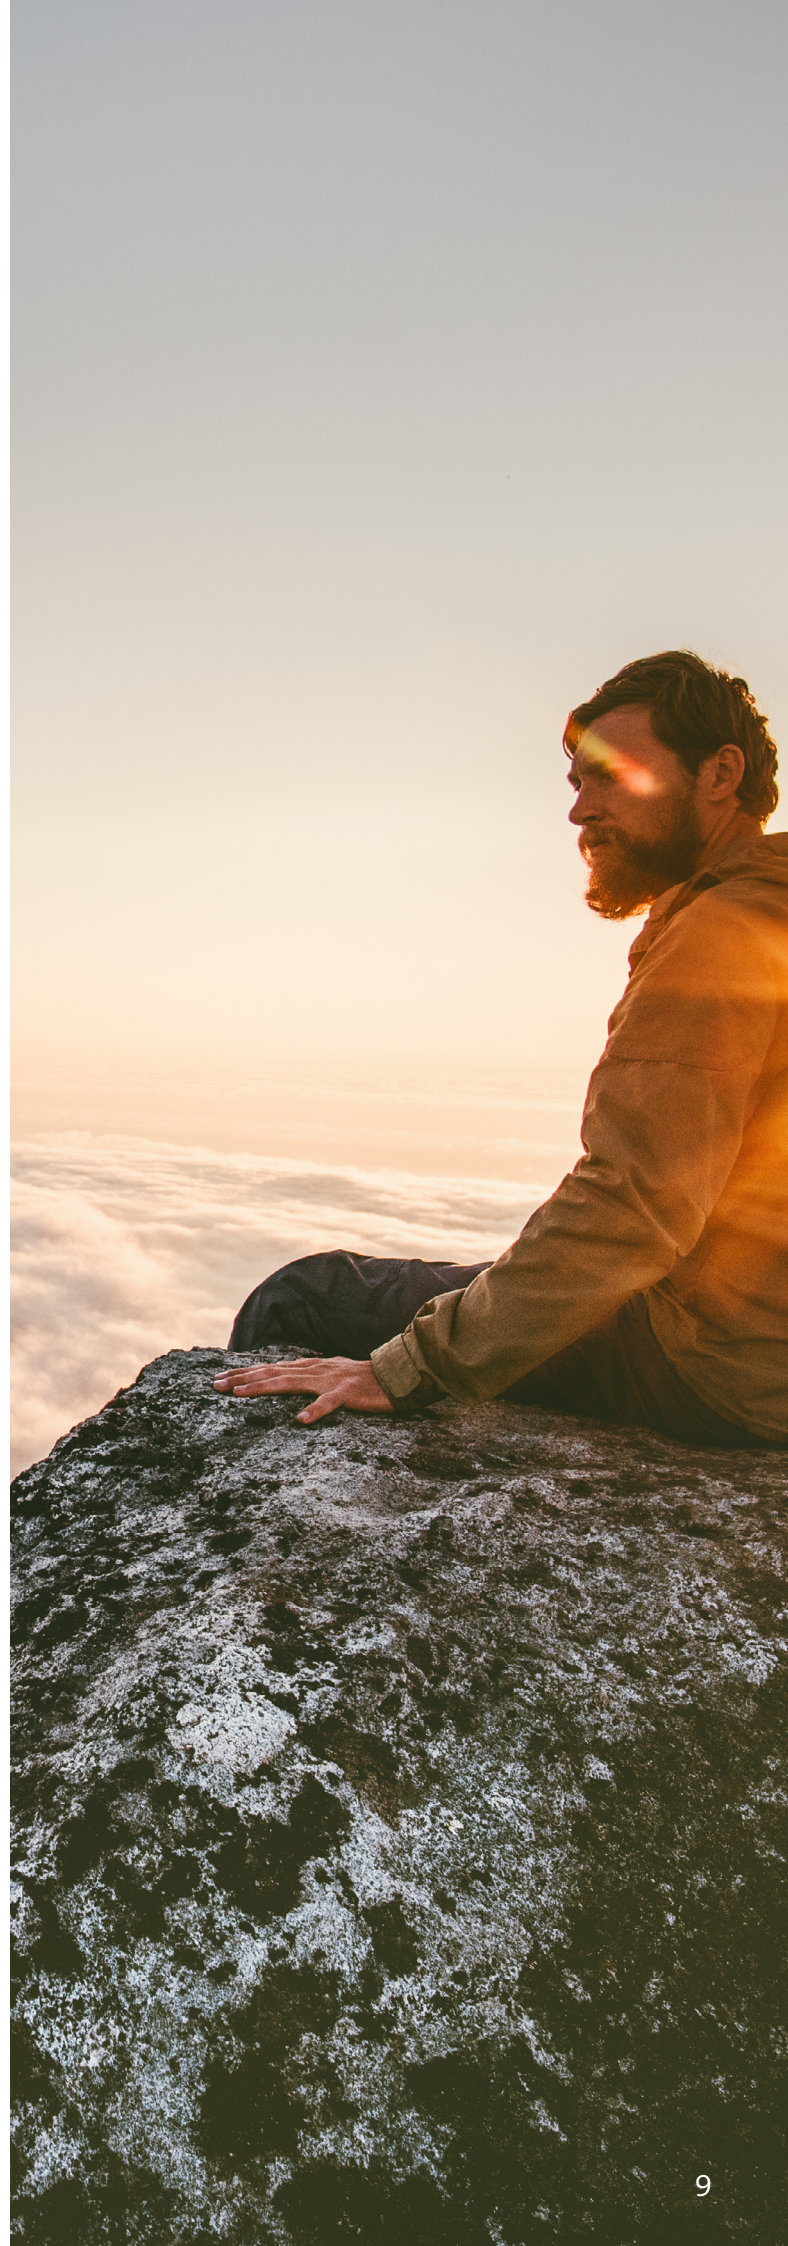

- Setting up your practice for implant treatment
- Financial benefits
- Benefits of a treatment coordinator
- Social media for practice growth

MODULE 13: Residential - Sallanches, France

- Implant design and what differentiates Axiom X3
- Science and technical features of materials
- Manufacturing and sterilisation process
- Placing implants on models with different bone densities
- Observe live surgery

CREATING NEW PATHS
WITH ANTHOGRYR®

Speakers and Mentors

An array of speakers and mentors have been brought together to deliver this course to ensure varied and high-quality teaching in every area. The faculty includes specialists in their registered fields and those at the fore of the profession, ensuring delegates receive up-to-the-minute, evidence-based instruction, support and on-going mentorship.

SPEAKERS AND MENTORS

SUNKANMI DEJI OLAORE

BDS MFDS RCS Glas BSc MSc Oral Surg Pgcert Implantology

DEJI qualified from the University of Birmingham in 2008 and 2013 where he won the Christopher Gaites prize in orthodontics and merit in special care dentistry. He has since worked in oral and maxillofacial surgery, oral surgery at various hospitals in the UK and was the clinical lead for minor oral surgery for the Oasis (BUPA) group Northern Ireland. Deji completed his Master's degree in Minor Oral Surgery in 2019 at the University of Plymouth, and has further his education in advanced aspects of surgical dental implant placement and restorations, alongside bone grafting and sinus lifts as part of the British Academy of Implant and Restorative Dentistry and Institute of Clinical Excellence. He has published several articles in the professional circular, lectures nationally and mentors both undergraduate and graduate students.

KUNAL SHAH

BDS PGCE Den Ed PGCE CUBS

KUNAL is the Principal of LeoDental in London. He graduated from Birmingham, was selected as a Finalist for 'Best Young Dentist South' 2018 at The Dental Awards, and also has the accolade of 'Best Implant and Imaging Clinic 2018 in London'. Having published several articles in the professional press and lectured internationally on the topics of digital dentistry and implantology, Dr Shah has also worked extensively as a clinical mentor, instructor, FD trainer and company key opinion leader (KOL).

BRIAN WESTBURY

FFFLM FFGDP FCGDent LLM MGDS BDS LDSRCS BA

BRIAN Westbury has degrees in Dentistry, Law and Psychology. He has experience running two successful dental practices and has worked as the secretary to four Local Dental Committees, as well as being a representative on the General Dental Services Committee. Brian was Chair of the Dentists' Health Support Trust for 10 years and he joined Dental Protection over 25 years ago, becoming a Senior Dentolegal Adviser. In 2019, he became the dental adviser to All Med Pro and the Academic Dean of the Faculty of Forensic and Legal Medicine RCP.

AMIT PATEL

BDS MSc MClintDent FDS RCSEd
MRD RCSEng

AMIT is a specialist in periodontics. He graduated in dentistry from the University of Liverpool in 1997 and obtained his Membership of the Faculty of Dental Surgeons at the Royal College of Surgeons in Edinburgh in 2000. Amit underwent a 4-year training programme in periodontics and implantology at Guy's, Kings and St Thomas' Dental Institute, achieving his Masters in periodontology and clinical dentistry. As Associate Specialist in Periodontics and Honorary Clinical Lecturer at the University of Birmingham Dental School, Amit also teaches at undergraduate and postgraduate level. He lectures both nationally and internationally and is the current President of the Association of Dental Implantology (ADI).

GIULIANO FRAGOLA

DDS MSc PhD

GIULIANO qualified from the University of Madrid in 1995, completing his Masters in Implant Dentistry in 1996. He is a Senior Fellow and past Study Club Committee Member of the International Team for Implantology (ITI), as well as an online reviewer and examiner for the prestigious organisation. Giuliano is also an internationally recognised speaker, and clinical advisor to Anthogyr for Straumann Group digital projects, as well as a practising clinician in a private practice in Spain.

JOEL THOMAS

BDS MFDS RCSEd MClintDent Perio
MPerio RCSEd

JOEL graduated from Bristol University following which he worked as a general dentist in Worcestershire. During this period, he became a member of the Royal College of Surgeons, gaining his MFDS post graduate qualification. Joel's passion has always been in surgical dentistry. He therefore went on to gain two years' experience as an Oral and Maxillofacial Surgery Senior House Officer. He was later awarded a place on the Periodontal Specialist training (MClintDent) at Guy's Hospital, London. During this four-year course, he also taught undergraduate students in the periodontal department and worked as a periodontist in multiple private practices around London. Joel has published numerous articles and has presented his work at multiple national conferences.

ADEDAMOLA (DAMMY) AWE

BDs

ADEDAMOLA Awe, aka Dammy, graduated from the University of Birmingham in 2011 and went on to complete postgraduate studies in the UK and abroad, including an extensive 1-year Advanced Aesthetics Course with world renowned dentist Dr Chris Orr. Dammy advocates for truly patient-focused dentistry and he applies the latest technologies to ensure micro-invasive approach wherever possible.

EKOW ACKOM-MENSAH

BDS Hons (Lond) MFDS RCSEd MSc
Implantology (Dist)

EKOW graduated with Honours from St Bartholomew's and The Royal London School of Dentistry in 2007, during which time he was awarded the BDS Part 5 prize for academic achievement and the BATLAA Elective Award 2006. In 2011 he obtained his Membership of the Faculty of Dental Surgery from the Royal College of Surgeons in Edinburgh. He completed his Masters in Dental Implantology, with Distinction, from the University of Manchester in 2014. Ekow has worked in hospital, NHS and private practice settings, and currently offers referral services at various practice and ICE (Implant Centres of Excellence).

CHRIS BURNS

BDS MFDS RCSEd MClintDent Endo
MEndo RCSEd

CHRIS graduated from the University of Birmingham in 2013 and was awarded the undergraduate Prize in Conservative Dentistry and the Tom Pitt Ford Prize in Endodontics by the British Endodontic Society. After spending time in general dental practice in Derbyshire, he worked as a senior house officer in Oral and Maxillofacial Surgery at York district hospital before returning to work in private practice. He passed his MFDS examinations in Edinburgh and was invited to join the Royal College of Surgeons in 2015. In 2022, Chris completed his specialist training in Endodontics at the prestigious Eastman Dental Institute, passing the Masters in Clinical Dentistry with distinction, as well as his Membership in Endodontics from the Royal College of Surgeons Edinburgh. Chris currently works in private practice providing endodontic services and teaches part-time at Birmingham Dental Hospital.

CIARA DEMPSEY

BDC Dental Hygiene and Therapy

CIARA has worked as a dental hygienist/therapist since graduating with first class Honours from the University of Portsmouth and winning the Dame Margaret Seward award in Dental Hygiene and Therapy. She currently works at The Wellington Clinic in London, where she offers an array of services to patients. Ciara believes that prevention is paramount in achieving good oral health, and particularly enjoys educating her patients on the benefits of good oral hygiene habits in a way that suits each individual and works around their busy lifestyle. She also prides herself on keeping up to date on the latest techniques available and is always looking for new advances and products, which will help her patient's keep their teeth and gums healthy for life.

SARAH FRANKS

BDS(ClinDist) MFDS MSc MOrth
RCS(Ed)

SARAH studied Dentistry at the University of Birmingham, where she was elected President of the University Dental Student Society for two terms. She is a Past President of the British Dental Student Association and received several prizes at undergraduate level for her work. Upon qualification, Sarah completed placements in dental hospital posts to further her knowledge in the fields of Restorative Dentistry, Oral Surgery, Paediatrics and Oral and Maxillofacial Surgery, gaining insight into the management of multidisciplinary cases. She went on to complete specialist training in orthodontics at Solihull Hospital and Birmingham Dental Hospital, before being awarded a Master's degree and a Membership in Orthodontics from the Royal College of Surgeons in Edinburgh.

HUGO PATRAO

RDT & Head of Medical Service
Centre, SMOP

HUGO has a degree in dental technology and has been working with heads of research and development teams from around the world. He is passionate about helping clinicians incorporate new technologies and digital planning into their practices and protocols, designing drilling guides and developing new drilling procedures.

MARK AMBRIDGE

CDT UCLan RCS(Ed) RDT UoL

MARK is a clinical dental technician with more than 36 years of experience in the dental profession. He is the Director for Dental Technicians at the British Academy of Cosmetic Dentistry (BACD) and founder of Ambridge Ceramics Ltd – a multi-award winning cosmetic and implant dental laboratory. Mark has gained a reputation for innovation, dependability and excellence, demonstrating the importance of a strong relationship between dentist and dental technician.

DAVE EDWARDS

DAVE is the Director of Resuscitation Consultancy Medical Services, a leading provider of training for medical emergency situations. He has more than 25 years of experience as a senior nurse and paramedic, having performed role such as a Resuscitation Services Manager and Lead Nurse for a large NHS trust. Dave also utilises his experience in his capacity as Course Director for the resuscitation Council UK and the Advanced Life Support Group.

ADELE HOLLAND

ADELE began her career in dentistry in 2007, spending many years working alongside some of the best clinicians in the UK, training and gaining knowledge in all areas and aspects of dentistry. Over the years, she has developed her skill set and taken on the roles of treatment coordinator, head dental nurse, compliance manager and implant coordinator, expanding specifically in implantology and surgical procedures. Adele has also led several courses for clinicians and dental nurses in implantology, specifically in asepsis, full arch cases and immediate loading. She has also gained postgraduate qualifications in radiography, intravenous sedation, practice management and dental implant nursing.

INDUSTRY SUPPORTED FACULTY MEMBERS

BETH CLEMENTS

(Clements Consulting)

BETH is the owner of Clements Consulting – an executive coaching and training consultancy that works with a diverse range of businesses to achieve sustainable success. She provides dynamic coaching for business owners, helping them to fulfil their potential through support in leadership development, assessment, conflict resolution, talent management, confidence building and more.

ALEXANDER WOODHAM

ALEX is a co-founder and Clinical Director of Dental Scan Ltd. He qualified as a Diagnostic Radiographer from St George's, University of London in 2004 and worked in general radiography at St George's Hospital, London before taking on a senior role specialising in dental radiology in 2008 at Guy's Hospital, London. In 2011 he became Lead Radiographer at CT Dent, later becoming Managing Director and the CQC registered manager. Over the past 18 years, Alex has gained extensive clinical and managerial experience and has been involved with teaching dental radiography techniques and image interpretation at undergraduate and postgraduate level. He is accredited with the Health and Care Professions Council (HCPC) and is a member of the British Society of Dental and Maxillofacial Radiology and the European and International Academies of Dental and Maxillofacial Radiology.

COMPANY PARTNERSHIPS

powered by **swissmeda**

SMOP, Swissmeda's industry-leading clinical software designed for implant cases, lets dental professionals plan implants based on a CBCT and model STL scan, delivering more precise drill templates for use during implant placement. Its framework integrates cloud-based planning with a one-of-a-kind guide design to improve surgery times and patient outcomes for implant surgeries.

ALL MED PRO

ALL MED PRO has supported the dental profession with dental indemnity insurance for the past decade. The team believes in delivering truly transparent advice and services, being responsive to individual's needs, and keeping their offerings as straightforward as possible. The goal is to build sustainable relationships with clients to support them for many years of their career.

The Anthogyr UK Team

The team behind Anthogyr understand the ever-evolving challenges that dentists today face when striving to deliver exceptional treatment to their patients. Should you have any questions about the products and services available to you, these people are all happy to help:

KATE KEATING

Head of Sales Anthogyr

KATE has more than 15 years of experience in sales, more than 10 years in the dental sector. A true leader, Kate heads the sales department for Anthogyr and the Neodent brands inside the Straumann Group UK Organisation.

TARA KHAN

Business Development Manager

TARA has more than 13 years' experience in the medical and dental sectors, having worked with the Straumann Group for the last 7. She is passionate about marketing and optimising brand opportunities and is on hand to help your practice boost its presence.

tara.khan@straumann.com
+44 7809 659860

CHRISTINE SMETHURST

Surgical Territory Manager North

CHRISTINE has deep experience in sales with a demonstrated history of working in the dental sector for over 20 years. She is skilled in sales, clinical dentistry, dental education and marketing. Highly skilled in lead generation through the use of social selling.

christine.smethurst@straumann.com
+44 7702 868599

CHLOE SWIFT

Surgical Territory Manager South

CHLOE has more than 7 years working in the dental profession, with experience of dental nursing and treatment coordination in both dental implant and orthodontic practices. In her role as Anthogyr Surgical Territory Manager, she is keen to support the growth of your practice.

Dental Implant Nursing Training Course

Clinical Instructor:
Adele Holland

This course was designed to help dental nurses overcome the barriers to dental implant training for successful career progression. As such, it provides access to a high-quality, flexible and affordable programme designed specifically for dental nurses. The blended learning platform facilitates skill development around your work and personal commitments.

£400 Incl. VAT

The course explores all the basics of dental implants and how to set up the surgery using an aseptic technique. It covers the dental nurses' role from a realistic perspective, offering practical advice and guidance to help delegates assist the implant dentist to a much higher level. The seven modules are delivered remotely, enabling delegates to schedule their learning to suit them:

MODULE 1: Introduction to Dental Implantology

- History of dental implants
- The basic principles of dental implantology
- Introduction to Anthogyr and the implant product range
- The benefits of treatment for patients

MODULE 2: Patient Journey and Consent

- Patient communication from the beginning of their journey
- Understanding the patient and their dental history
- Contraindications for implant treatment
- Facilitating a seamless patient journey
- Informed consent

MODULE 3: Diagnosis and Dental Anatomy

- Improving patient education
- Anatomical overview for treatment planning and execution
- Safe surgical assistance
- Overview of bone classification and distinguishing features
- Osseointegration

MODULE 4: Surgical Preparation

- Preparing relevant implants and components prior to surgery
- Aseptic techniques, surgical donning and gloving
- Surgery set up
- Surgical suction and other ways to assist the oral surgeon
- Post-operative patient care

MODULE 5: Decontamination + Instrument Maintenance

- Identify surgical tray instrumentation and surgical implant components
- Decontamination and maintenance of equipment
- Infection control and its importance

MODULE 6: Types of Implant Treatment

- Overview of restorative treatment stages
- Surgery set up for single, multiple and full arch implant treatment
- Alternative treatment options
- Overview of bone grafting and sinus lift techniques
- Long-term maintenance of implants

MODULE 7: Practical Day (Half-Day)

Practical

- Surgery set up with aseptic techniques
- Surgical hand scrubbing and donning of sterile PPE
- Identify surgical instrumentation and its use
- Set up surgical motor
- Hands-on placement of implant on bone blocks to get familiar with surgical kits

For more information, please contact
admin@implantconnect.com

Surgical Guide Training Course

Clinical Instructors:
Hugo Patrao
Giuliano Fragola
Kunal Shah
Deji Olaore

This short course is one of the several additional training opportunities available through Implant Conneqt and Anthogyr for dentists.

It offers adjunctive teaching for delegates to enhance their knowledge, skills and confidence in constructing and utilising guided surgery implant placement techniques.

The course covers:

£600 Incl. VAT

MODULE 1: Acquiring Accurate Data

- Introduction to guided surgery
- Principles of acquiring high-quality data from CBCT and intraoral scans
- Improving accuracy of guided surgery

MODULE 2: Types of Surgical Guides, Drilling Protocols and Pitfalls

- Digital planning and reducing potential pitfalls
- Drill protocols when using surgical guides
- Purpose of skeletal guides
- Partially vs fully guided techniques

MODULE 3: Designing a Surgical Guide

- Overview of the guided surgery workflow
- Different types of surgical guides
- Designing a surgical guide using SMOP
- Surgical guides in clinical scenarios

MODULE 4: Pilot Guided Implant Surgery

- Overview of pilot guide implant surgery
- Drilling protocols for pilot guided implant surgery
- Surgical guide design and materials for single and multiple unit cases
- Pitfalls and complications of pilot guided implant surgery

MODULE 5: Fully Guided Implant Surgery

- Overview of fully guided implant surgery
- Drilling protocols for fully guided implant surgery
- Surgical guide design and materials for full guided implant surgery
- Pitfalls and complications

MODULE 6: Practical Day

Practical

- Data acquisition and pitfalls to avoid
- Review different types of surgical guides
- Understand various sleeves, surgical guide drill kits and protocols
- Hands-on designing surgical guide with SMOP
- Hands-on placement of implants in models using guided surgical workflow

For more information, please contact
admin@implantconneqt.com

Soft Tissue Training Course

Clinical Instructors:

Joel Thomas
Kunal Shah
Deji Olaore

The short programme offers clinicians support on some of the periodontal issues that may accompany implant treatment in order to optimise outcomes, even in cases where the soft tissue is compromised.

The course explores:

£750 Incl. VAT

MODULE 1: Flap Designs

- Principles of flap design
- Flapless vs flap surgical techniques
- Pitfalls and complications of poor flap designs

MODULE 2: GBR and Sinus Lifting

- Principles and science of GBR
- Types of bone augmentation techniques
- Clinical indications for different augmentation materials
- Sinus lifting techniques

MODULE 3: Soft Tissue Manipulation

- Indications for peri-implant soft tissue surgery
- Peri-implant soft tissue vs periodontal tissues
- Optimal peri-implant soft tissue dimensions
- Soft tissue augmentation techniques

MODULE 4: Wound Closure and Suture Techniques

- Importance and types of sutures
- Common complications

MODULE 5: Practical Day - All Hands-On

Practical

- Flap design and elevation for full and split thicknesses
- Periosteal release and tissue advancement
- Harvesting autogenous grafts (CTG and FGG)
- Placement and stabilisation of graft materials
- Suturing techniques

For more information, please contact
admin@implantconnect.com

Clinical Photography Course

Clinical Instructors:
Dammy Awe
Kunal Shah
Deji Olaore

Good quality clinical photography is important for diagnosis and treatment planning, as well as case monitoring, documentation, patient communication and self-reflection. This short course will help delegates enhance their skills and confidence in the field to ensure consistently exceptional photography in practice.

£500 Incl. VAT

MODULE 1: Importance of Clinical Photography

- Utilising clinical photography for growth and personal development
- Treatment planning and smile design
- Lab communication
- Patient records and communication
- Marketing
- Views needed and camera settings

MODULE 2: Technical Aspects

- Exposure trinity of photography (IOS, shutter speed and aperture)
- Importance of lighting
- Typical camera settings
- Equipment you need to get started

MODULE 3: Demonstration

- Vertical positioning of clinician for close up and portrait views
- Placement of retractors
- Placement of contrastor
- Patient positioning for occlusal views
- Twin flash positioning
- 12 o'clock positioning

MODULE 4: Practical Day (Half-Day)

Practical

- Overview of clinical photography and technical set up
- Intraoral views and full clinical series of photos
- Artistic photography
- Studio style photography
- **Delegates advised to bring own camera**

For more information, please contact
admin@implantconnect.com

Testimonials

“Implant Connect embodies the new era of post graduate training. The course brings true flexibility and therefore enables students to complete the training whilst maintaining a working week. This offers huge opportunity that has not been seen before. I am honoured to be part of this unique regime.”

JOEL THOMAS,
SPECIALIST PERIODONTIST

“This course embodies the many different aspects that must be considered in order to deliver effective and high-quality dental implant treatment. It’s a great way for clinicians – and their teams – to develop their skills in a way that ensures their new-found knowledge is directly applicable to practice. I am delighted to be a part of this course and to highlight the importance of periodontal management for excellent implant therapy outcomes.”

AMIT PATEL
SPECIALIST PERIODONTIST

“Implants, from being an exotic dental treatment have become a reliable method of replacing teeth that can be performed by any dentist with the correct training. This course offers a comprehensive coverage and goes on to mentor and assist trainees so that they can offer their patients implants as an option. As a Dentolegal Consultant I see the results of untrained work leading to civil action. I recommend that all dentists wishing to offer a full range of replacement options take a course as good as this for their benefit and the benefit of their patients.”

BRIAN WESTBURY
ACADEMIC DEAN FLLM

“There are many dental implant nursing courses available, but this one is different in that it has been tailored, by a practising dental implant nurse, specifically for professionals in the field today. The programme is very comprehensive, covering a wide range of areas while taking a practical approach that fits within a realistic dental nursing environment. It’s priced to make it as affordable as possible, and includes both an examination and practical session to demonstrate and test the skills being learnt to ensure tangible career development.”
