

IMMEDIACY IN THE FULL ARCH

with Dr. Wael Att

This clinically oriented 2-day course provides clinicians with everything they need to gain understanding about immediacy in full-arch procedures. The event features lecture, live surgery, and hands-on learning. This intensive course is designed to provide attendees with state-of-the-art protocols and workflows relating to implant placement and rehabilitation of edentulous jaws and terminal dentition. Principles and guidelines for immediate implant placement and loading protocols using revolutionary workflows will expose participants to different clinical scenarios they may face in everyday practice. At the end of the course, participants should be knowledgeable on how to carefully plan and execute predictable immediate full-arch implant rehabilitations.

Learning Objectives

- Smile design – 2D and 3D projects and significance in full-arch cases
- Immediacy in full arch – keys to predictable results
- Material selection for full-arch rehabs
- Tips and tricks for predictable smile design in full-arch cases
- Bottlenecks and complications in full-arch immediacy implant cases
