

The Year Two Implant course

The Year Two Implant Course has been designed to naturally proceed from The Year One Implant Course. Consisting of 15 total days, it is the ideal programme for delegates looking to further develop their knowledge base and surgical skills.

Aims & Objectives:

- To consolidate previous implant learning & revisit the aspects of straightforward cases.
- To expand treatment skills into more advanced cases
- To become competent in CBCT interpreting and reporting
- Introduce advanced concepts via 3 day live skills courses
- Allow flexibility for delegates to map their preferred implant career pathway
- Improve your surgical competence and confidence via the mentoring days

The Year Two Implant Course has been designed to give dentists who have a foundation in straightforward implant dentistry, a launchpad into more advanced and complex treatments.

"Superb follow on to year 1. The growth in knowledge and confidence I have felt after year 2 is huge and would definitely recommend the tribe to any aspiring dentist".

Andrew Isaac - Year Two Implant delegate
