

RESTORATIVE AND SURGICAL SYNERGY: A ROADMAP FOR SUCCESS

How to stand out as a referral based, restoratively focused implant surgeon in a competitive environment

with Dr. Evan Chafitz and Dr. Ira Langstein

The field of dental implants has undergone radical change over the past several years, utilizing digital technology to improve patient outcomes. Since dental implantology is a multidisciplinary field, communication in treatment planning and execution between the surgeon and restorative dentist is vital to successful treatment. This program will empower implant surgeons to maximize digital technology, improve prosthetically predictable outcomes, improve communication with general dentists, and become familiar with the 'parts and pieces' of restorative implant dentistry, and stay at the forefront of a competitive implant market.

Objectives:

- Components of the digital workflow
- The key elements of communication between the referral-based surgeon, restorative dentist, and the laboratory
- Flexibility in the workflow addressing the roles of the referral-based surgeon and the restorative dentist
- 'Parts and pieces' – what the components are and how to leverage them
- Concepts and fabrication of digitally-driven surgical guides
- Learn what the restorative dentist needs, and how to become a premier destination implant referral surgical referral practice
- Decision tree involving immediate provisional restorations and custom/anatomic healing abutments
- Single, Partial, and Full arch treatment planning, conversion strategies, and communication for final restorations
- Unique hand-on 'parts and pieces' experience
- Troubleshooting
- Future trends in implant technology
