Clinical Affairs Team

PREREQUISITE:

Completion of on-demand content is mandatory. Additional details will be provided one month before the course start date.

This is an introductory course into the world of Implant Dentistry, designed for professionals who already have experience with minor oral surgeries but not necessarily implant placement ones. Indicated for doctors who want to acquire and share knowledge and professional experiences in a diverse range of implant and implant related procedures, from CBCT analysis and fundamental concepts, through treatment planning, implant placement, and implant restorative workflows.

OBJECTIVES

- The fundamental concepts of bone physiology, bone density, and applied anatomy.
- Anesthesia, incision, flap design, suturing, and therapeutics.
- Applied Imaging, treatment planning, 3D Implant positioning, biological width preservation, drilling, placing and loading protocols.
- Implant restorative workflows for singles and bridges.
- Through lecture, discussions, hands-on workshops and pig jaw surgeries.
