ITI Masterclass Ghent University

Two-day cadaver course on bone and soft tissue augmentation.

New!

- Alveolar ridge preservation with autogenous and xenogeneic bone
- Bone shell technique with autogenous bone, xenogeneic bone and synthetic bone
- Connective tissue graft and free gingival graft

Bone augmentation with a bone block and guided bone regeneration are the most documented techniques to augment the deficient ridge in the horizontal and vertical dimension. In this 2-day masterclass bone augmentation is discussed from A to Z focusing on biological principles of wound healing, anatomical considerations, intra-oral bone harvesting procedures and the use of biomaterials. Since bone augmentation requires extensive flap advancement, lack of keratinized tissue and/or soft tissue convexity are common findings. Therefore, soft tissue augmentation techniques are usually required. Finally, relevant medication is discussed to prepare and support the patient prior to and after surgery.

The following surgical procedures are theoretically discussed on the first day and fully practiced on the second day:

- Intra-oral bone harvesting of bone particles and a bone block
- Alveolar ridge preservation as an alternative to bone augmentation
- Implant placement and simultaneous Guided Bone Regeneration
- Bone augmentation with the bone shell technique
- Sinus lift with or without simultaneous implant placement
- Connective tissue graft
- Free gingival graft

Practical information

- Thursday 28th of August: theoretical part from 9h30 until 18h in Auberge du Pêcheur
- Thursday the 28th of August: dinner at 18h in Auberge du Pêcheur
- Friday the 29th of August: practical part on cadavers from 9h until 17h in Anatomy lab UZ Gent (Entrance 23)
- Subscription fee for the whole course including all coffee breaks, the lunch on Thursday and Friday and the dinner on Friday evening
- 1300 euro for ITI members, 1600 euro for non-ITI members (excl VAT)
- Excluding hotel stay. This needs to be booked by the participant itself.
- More info: www.auberge-du-pecheur.be
