## **25 Years of Advancements in Implant Dentistry Driving Clinical Applications in Today's Practice**

To commemorate this milestone, we warmly invite you to this daylong special celebration offering valuable information and collaboration opportunities. The program is highlighted by international key opinion leaders on topics in implant dentistry that can immediately impact your practice. Presentations will not only cover the evolution of treatment over the past 25 years, but will focus on what we have learned and we successfully apply it today. After a day of continuing education, be sure to join us at the Champions Club (Ben Hill Griffin Stadium) for an evening of drinks, appetizers and fun!

All proceeds from this meeting including registration, donations, raffles and sponsor fees will go to the UF Center for Implant Dentistry Foundation which will be used for future improvements and resident/fellow education opportunities.
