# Introduction to Fixed Full Arch

**DATE & TIME:**

Thursday, May 29, 2025

Friday, May 30, 2025

Saturday, May 31, 2025

7:30am–8:00am

Registration

8:00am–4:00pm

Program

**LOCATION:**

Mansfield Facility

1961 Heritage parkway

Mansfield, TX 76063

**TUITION:**

Complimentary

**AUDIENCE:**

General Dentist

**AGD CODE:**

690

**SAC:**

Complex

**TYPE:**

Lecture/Participation

**CE HOURS:**

6.0 hours per session

**SPEAKER:**

Dr. Amir Fakhrazadeh

The implant-retained full-arch restoration is an efficient and predictable solution for edentulous and terminally dentate patients, giving them their smile back and increasing their confidence and self-esteem. During these sessions we will discuss full-arch rehabilitation, including treatment planning and the step-by-step surgical and prosthetic conversion stages of the procedure.

## OBJECTIVES

- Understand which patients can benefit from a full arch implant-supported fixed dental prosthesis and discussing case selection.
- Understand the fundamental steps and protocols for achieving the required inter-arch occlusal space.
- Identify the anatomic landmarks and methods of identification to optimize the main working area.
- Anterior-Posterior (AP) Spread: Rationale for angled/tilted and straight posterior dental implants.
- Understand how to select the proper abutment angulation and collar height to preserve the biological width.
- Understand the surgical sequence and immediate denture conversion with hands-on workshops focused on both surgical implant placement for full arch and the conversion process.

## DR. AMIR FAKHRZADEH

**DR. AMIR FAKHRZADEH** Sr. Manager of Clinical Education, DSO NAM, for the Straumann Group. Is a boardcertified Periodontist with clinical and research expertise in implantology and regenerative dental biomaterials in both academic and private practice settings. He received his D.M.D degree from the Boston University School of Dental Medicine. Then went on to complete a NIH T32 postdoctoral research fellowship in Regenerative Medicine at the New Jersey Center for Biomaterials. He completed his clinical specialty training in Periodontics & Implant Surgery as well as a M.S. in Biomedical Science at Rutgers School of Dental Medicine and New Jersey Medical School, respectively. His clinical, academic, and research interests are focused primarily on translational research, clinical education, and clinical implementation of dental implant therapy and implantable biomaterials.
