

# STRAUMANN DIGITAL FULL ARCH FP1 IMPLANT SUMMIT

with Dr. Panos Papaspyridakos, Dr. Konstantinos Chochlidakis, Dr. Thanos Kristallis, and Dr. Katya Archambault

## DESCRIPTION:

Join us in beautiful La Jolla, California, for an immersive two-day course focused on structured digital protocols for guided surgery and prosthetic delivery of immediate FP1 full-arch implant prostheses. Experience every clinical and laboratory step in real time, including a live surgical conversion of a terminal dentition to full-arch implants and a complete prosthetic workflow using photogrammetry.

The course will cover facially driven digital data acquisition, diagnosis, AI-assisted treatment planning, 4D occlusion, and digital design, led by a board-certified Maxillofacial Radiologist and experienced Prosthodontists and Maxillofacial Prosthodontist.

Participants will actively engage in the smile design, 3D printing, and final prosthesis delivery process.

## OBJECTIVES:

- Understand the full digital protocols for FP1 full arch implant prosthesis.
- Understand the importance and processes of acquisition of Bioimaging data in Diagnosis, Treatment Planning and deliverables in full arch implant reconstructions.
- Understand the latest software available for digital treatment planning and design.
- Understand the latest technologies in photogrammetry, grammetry and IOS digital full arch impressions.
- Observe the guided live patient surgical implant placement and manufacturing processes for FP1 full arch prosthesis.
- Insights into what the digital dentistry future will look like with AI and VR.
