This course is focused on further expanding your treatment armamentarium in the offering of esthetic implant-supported restorative treatments. The aim of this program is to allow learners to develop their professional knowledge by identifying and understanding fundamental aspects related to the planning, surgical placement and prosthetic procedures which will play significant roles on the final esthetic outcomes of the cases.

**OBJECTIVES**

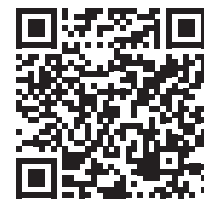

- Prosthetic space considerations and prosthetically driven treatment plan and guides for esthetic restorations
- Re-anatomization of ridges for ideal Implant placement
- Biologic width preservation and its importance on bone maintenance and esthetics
- Emergence profile creation, maintenance and transfer with Impression taking and intra-oral scanning
- Cover Screws, healing abutments and temp abutments (immediate and conventional)
