

AN INTERACTIVE 3-DAY MASTER COURSE WITH  
LIVE SURGERIES AND HANDS-ON WORKSHOPS

# Master Course on Implant Therapy in elderly patients

Strategies in partially and fully edentulous patients

**September 3<sup>rd</sup>–5<sup>th</sup>, 2025**

André Schroeder Auditorium

Freiburgstrasse 7, 3010 Bern, Switzerland

This multidisciplinary course focuses on evidence-based implant therapy for elderly patients with complex dental rehabilitation needs. The program is designed for clinicians seeking to enhance their surgical and prosthetic skills in treating partially or fully edentulous patients, with a special emphasis on older adults.

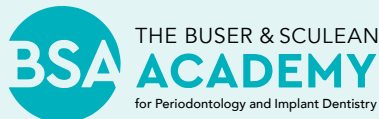

Participants will gain insights into contemporary treatment planning concepts, surgical approaches, and prosthodontic workflows. Digital tools such as virtual planning, guided surgery, and AI applications in implantology are highlighted throughout the course.

## Core topics include

- Hands-on training for intraoral scanning, AI-based provisionals printing, model-based training implant placement and use of the Locator Fixed® system
- Two Live surgeries of complex cases with interactive discussion
- Lectures from experienced faculty including:
  - Surgical concepts for long-term success
  - Treatment planning for older patients
  - Aesthetics in implant prostheses
  - Overdentures versus full-arch prostheses
  - Zirconia and high-performance materials
  - Digital workflows & AI-based design
  - The Bernese Concept for overdentures
  - Smile in a box®
