\$1,995 for Dental Professionals

Course Details

Ready to elevate your implant dentistry skills with digital precision? Discover how utilizing Straumann's cohesive technology can simplify and enhance every stage of treatment. In Scan, Plan, Place: Smart Planning for Predictable Outcomes, dental professionals will learn to diagnose, scan, plan, and restore implants using Straumann's fully digital system.

8 CE CREDITS

This course covers CBCT interpretation, intraoral scanning using the Sirios scanner, guided implant planning with coDiagnostix, and digital restoration techniques. You'll also gain strategies for identifying implant opportunities, improving patient communication, and increasing case acceptance with visual tools like Smilecloud.
