

Management of Implant-Related Complications in the Aesthetic Zone

From theory to practice

+ *Atelier Dental* MADRID

 **straumann**

+ About

- + Two-day module, aimed at dentists who want to update and expand their knowledge in solving implant-related aesthetic problems in the anterior zone.
- + Surgical and prosthetic treatment alternatives to successfully correct the detrimental consequences of implant therapy in the esthetic area will be reviewed.

- + Day I: Surgical management of complications
From 09:30 to 19:00
- + Day II: Prosthetic management of complications
From 10:00 to 14:00
- + Campus: González + Solano Atelier Dental
C/Blanca de Navarra 10, (28010) - Madrid
- + Dates:
Oct 8 and 9, 2026

+ Day I

Surgical management of complications

- + Decision tree for the management of complex implant cases in the aesthetic zone.
- + Flap design and management: pedicle vs. tunnel.
- + Soft tissue grafting around implants: how, when and why.

+ Day II

Prosthetic management of complications

- + Soft tissue conditioning around implants.
- + Advanced concepts on implant provisionalization.
- + Critical and subcritical contour. Foundational principles and clinical application.
- + Hands-on: Implant provisionalization.
- + New technologies and advanced solutions.
- + Ortho-Perio therapy.
