Lecture

**CE HOURS:**

8.0 hours per day

**SPEAKER:**

Dr. Mahmoud Serag

This two-day live surgical dental implantology course is designed for professionals who are starting their surgical dental implant journey. It is geared towards treatments where dental implants are utilized to support single implant restoration (single crowns) and focused mainly on surgical implant placement in the posterior area in healed sites. The course combines comprehensive theoretical instruction during surgery, offering participants a unique opportunity to observe real-time clinical decision-making and technique execution. Attendees will be guided through patient evaluation, case planning, and the surgical workflow from start to finish.

OBJECTIVES

- Know the fundamental concepts of bone physiology, bone density, and applied anatomy.
- Identify the process of planning implant placement virtually to determine the optimal size and positions of the implant bodies using Carestream implant planning software.
- Implement Immediate Vs. Delayed implant placement techniques.
- Perform different suturing styles associated with single implant placement surgery.
- Execute Implant osteotomy preparation/drilling and placement.

DR. MAHMOUD SERAG

DR. MAHMOUD SERAG is Local Start Dental's full time Clinical Director. He is a Board-Certified Prosthodontist, and prior to launching Local Start Dental in 2021 he headed the Prosthodontics Department at the ECU School of Dental Medicine for seven years. He has also completed his Certificate in Prosthodontics from the University of Medicine and Dentistry in New Jersey and subsequently completed a Fellowship at the Implant-Periodontal-Prosthodontics Postgraduate Program at the University of Maryland. Dr. Serag is skilled at executing simple and complex implant cases including All-on-4s and Overdentures. He thrives on sharing his clinical knowledge with other dental professionals.
