13203 Hadley St Suite 101

Whittier, CA 90601

TUITION:

Complimentary

AUDIENCE:

General Dentist

AGD CODE:

690

SAC:

Straightforward

TYPE:

Lecture

CE HOURS:

2.0 hours

SPEAKER:

Dr. Je Dong Ryu

The dental patient has been replaced by a dental consumer looking for proven, predictable solutions. Tooth loss and replacement pose both physical and emotional effects on patients. Understanding indications for treatment and effectively communicating benefits while managing expectations are critical in delivering predictable outcomes. Collaboration among the entire dental team strengthens the knowledge of case selection, case presentation and ultimately case acceptance. This session identifies the true impact of the interdisciplinary relationship between the dental hygienist, dental assistant, administrative team, restorative dentist and specialist.

OBJECTIVES

- Identify basics of implant types and components.
- Communicate benefits of implants versus crown and bridge.
- Understand benefits of surface technology from placement to final restoration.
- Understand how mechanics of implant design impact crestal bone maintenance.
- Increased case acceptance through effective communication.
- Enhance the knowledge of implants among the entire dental team.
